Internal Participants Count	Students : 500	External Participants Count	-

#### Summary

The NSS, YRC, and RRC jointly organized a Deworming Programme on 10th February 2025. The programme commenced at 9:30 a.m. The session was led by the chief guest, Ms. Arthi, a Mid-Level Health Provider from Chinnakallupalli. She delivered a detailed and informative lecture on the importance of Albendazole in treating and controlling worm infections. Albendazole tablets are used to treat intestinal parasitic infections such as roundworms, hookworms, and whipworms. They are also effective in treating tissue infections like neurocysticercosis and hydatid disease. Regular deworming with Albendazole helps prevent complications such as anemia, malnutrition, and organ damage caused by parasitic infestations. The session was interactive, with enthusiastic participation from both students and faculty. Overall, the programme had a positive and impactful effect on the students. Albendazole tablets were distributed to the students, and more than 500 students benefited from the programme.

#### Outcome of the Programme

The students learned about

1. Importance of Albendazole Tablet
2. Learned about worming infections
3. Gain knowledge about prevent the complication of infections
