Summary

The Department of Data Science and PG Department of Computer Applications, under the course "**Fundamentals of Data Science with Python**", jointly organized a **Statistics Exhibition** showcasing the creativity and analytical skills of II B.Sc. (Data Science) students. The focus of the exhibition was on **Descriptive Statistics**, with extensions into concepts like the Data Science Process, Data Mining, and Data Warehousing.

Each team presented the statistical concepts through Charts, Graphs, Interactive Jupyter Notebooks, Games, Quizzes, Thematic Posters, and Team Presentations to make statistics **engaging and accessible**. The event fostered **peer learning, collaboration, and practical application** of classroom concepts, demonstrating both technical and communication skills.

Faculty and visitors appreciated the clarity of presentations, creativity in design, and depth of understanding shown by the participants.

Key Outcomes

- Strengthened conceptual clarity in statistics
- Encouraged teamwork, leadership, and presentation skills
- Provided exposure to data visualization and computational tools
- Inspired enthusiasm toward learning statistics in an applied manner
- This exhibition serves as a model for blended learning, combining academic rigor with creativity and fun—laying a strong foundation for future data science explorations.
